### WHAT CAN WE DO FOR YOU?

#### CCS Havel

3167 Enterprise Dr.

Saginaw, MI 48603

T: 989.797.4644

[ccshavel.com](http://ccshavel.com)

Trusted by leading organizations throughout Michigan, CCS Havel provides specialized temperature control and automation systems, proven energy efficiency services, and ongoing maintenance and support.

We offer single-source, self-performed services, helping ensure projects are streamlined, cost effective, and high quality. Our experience includes a variety of commercial, institutional, and industrial clients, with a long track record of successful projects in the education and healthcare sectors.

### Building Automation and Controls

We are one of the most experienced building automation and temperature controls providers in the state, utilizing the latest open-platform technologies. Services include:

- > Design
- > Installation
- > Integration
- > Support and troubleshooting
- > System updates and migration
- > System programming, sequence of operation, and scheduling
- > Alarm monitoring

### Energy Services

Our team can assess your operations and provide a number of energy conservation measures and advanced technologies to help maximize efficiency. Our power quality management services help clients improve the reliability and function of their energy systems, while our

mechanical, electrical, and lighting retrofits are specifically designed to help cut energy costs.

### Security

With a team of skilled designers and installers on staff, we provide end-to-end security system solutions that help you protect your business and its assets. We utilize state-of-the-art technology and design systems with flexibility for future growth.

### Maintenance and Support

Long after construction/installation is over, you can depend on our team to keep your systems running effectively with ongoing preventive maintenance and emergency response. We also offer building operations services with on-site personnel that provide HVAC, janitorial, and facility management solutions.
